INITIAL SCREEN

Search bar displayed. This will allow to search for top ten attributes (we do not know what is available yet so cannot efine further)

On initial locad the top ten for either the default top ten or the last loaded query are displayed

Top Ten will differ on different web-sites, this dropdown will give users a choice of which ones to use

SONG CHOICE MADE

When a song box is pressed, extra info is displayed bekow and the presentation box is filled with a video/audio frame and a lyrics frame

Our first choice is to display a video, but youTube requires copyrighted material to only play on their website, so box will be black. In this case we will display an audio player

SongList

PresentationBox

Lyrics

Pressing on a favourite song in the box will make it's presentation box display the relevant information

The favourite icon in the song box will allow user to curate their favourite songs on the side (to be saved locally). The x in favourites will allow users to delete the song

MEDIA SMALL

Search

Search Box

The search icon will display the search
in the "hidden area" below the header

Pressing the song will toggle display of the
presentation box below the button.
The song title should slide up to the top of
the screen to give presentation box the maxi-
mum area
